

The duck

Alessandro Busana

"The picture of a faithful duck sitting beside the sofa, with a coffee table balanced on its head, ready to hold remote controls, smartphones, books and magazines, was so absurd and unlikely to me that I was immediately won over", the fun comment by the designer Alessandro Busana.

Thanks to the various colour options, the illuminated version and its eccentric nature, The duck can be both bemusing and functional anywhere in the home, from the living room to the bathroom, the bedroom and even the garden.
