

KADOU

design Ryosuke Fukusada - 2013

Oriental culture and tradition , Made in Italy production know-how: it would be impossible to miss these two ingredients in Kadou, the coat stand that recalls the shapes of a traditional Japanese vase of flowers. Its name in fact means "the art of flowers".

The base of Kadou, which is made of batch-dyed polyethylene, is available in white, anthracite grey and dove-grey. The five branches are instead made of painted metal, in eight different shades: green, powder pink, coral red, brown, white, orange, anthracite and ivory. Kadou is also available in a version with an illuminated base, and it can be used as a lamp (Kadou Light).

BASE:

matt white polyethylene

matt anthracite-grey polyethylene*
