

POWDER-COATED **ALUMINIUM** FURNITURE

POWDER-COATED ALUMINIUM FURNITURE

Cane-line offers a wide range of furniture in powder-coated aluminium. Powder coating serves as a protective layer that is tinted in a variety of colours.

Aluminium furniture is ideal for use outdoors as well as indoors.

REGULAR MAINTENANCE & CLEANING

Aluminium furniture generally requires a minimum of maintenance.

Wipe furniture down after use with a moist microfibre cloth and mild detergent.

Don't be too rough on your furniture to avoid causing dents, as this can damage the powder coating. At worst, moisture can reach the aluminium and damage the finish.

STORING

Your furniture can stay outdoors all year round, but it is best to store it under a furniture cover during winter months or during periods when the furniture is not in use. Please note, however, that condensation can form under the furniture cover, which can cause mould and mildew. Therefore, make sure to lift the cover away from the furniture to ensure proper air circulation and minimise condensation.

If possible, it is best to store your furniture indoors during winter months to protect it from the elements.
