DESCRIPTION

The FINESTRA FLUTES mirror adds diffused light and mystery to every interior. It was created during silvering experiments and inspired by contemporary architecture. Silvering the textured glass with smooth vertical grooves produces a surprisingly aesthetically-pleasing material. Combined with the refined black frame and clear mirror

parts, this mirror evokes a sense of images from both vintage stained glass partitions and modern architecture. The reflection in the mirror is split into both fractured and clear reflections. The contrast between these two images is intriguing. Finestra can be hung either horizontally or vertically and is also available with Deco glass instead of the smooth vertical grooved-glass.
