

Vermelha

Fernando and Humberto Campana

General description:

Wrapping armchair with epoxy powder painted steel frame and massive aluminum legs. Several days' manual work and a high expertise craftsmanship in this interlacement are necessary for creating the armchair. About 500 meters of special rope with an acrylic core covered in cotton, are first woven onto the frame for creating a structure and then they are knotted in a consecutive overlapping, so that a kind of free interlacement is the result, a unique mark of the Campana brothers.

Technical description:

Structure in epoxy lacquered steel.

Seating in cotton and acrylic rope in the colors available in the collection.

Feet in glazed aluminum.
