

BONNET

Odo Fioravanti, 2014

With its elegant sinuous shape, Bonnet is the new LED lamp that reworks the concept of indirect lighting. The top part conceals a small yet very powerful LED source whose ray of light is mainly directly upwards onto the wall and ceiling. The designer also wanted to play with the parasite light that is normally lost, recuperating it with a lens and directing it downwards. In this way, Bonnet not only lights itself up but also produces a downwards glow.

Wall lamp with indirect light dimmable. Frame made of painted die-cast aluminium. Integrated led source, degrees kelvin 2700.
