

FRITZ HANSEN

LEATHER GUIDE ENGLISH

All our customers are different and have individual needs.
Therefore, Fritz Hansen offers a wide selection of
leather types to make the furniture fit perfectly
into the individual home

LEATHER

A NATURAL MATERIAL: LEATHER

Leather has a natural surface, which mirrors the active life of the animal. Insect bites and scars were a natural part of the daily life of the animal and the natural markings are part of the leather's expression and will be visible together with other natural markings.

NATURAL MARKS

The typical natural characteristics that can occur on the different leather types are:

- Insect bites
- Scars
- Neck wrinkles
- Beauty marks
- Colour difference from one leather hide to another, and even within a single leather hide
- Variation in the natural grain from one hide to another, and even within a single hide
- Hair whirls

MAINTENANCE

The best maintenance for all types of leather from Fritz Hansen is regular vacuuming with a soft brush. Avoid using cleaning products and sharp objects. If cleaning is necessary use boiled water with natural soap shavings of good quality.

Whip 2-3 tablespoons of soap flakes in 1 litre water and only use the foam. Apply the foam with a soft cloth, let the furniture dry and dry afterwards the leather off thoroughly with a soft cotton cloth.

NOTE

Please note that quality Suede must only be vacuumed and NEVER applied water or soap.

STAIN REMOVAL

Fritz Hansen recommends no other means than the use of soap flakes for stain removal. The use of harsh cleaners are not covered by the warranty.

WARNING

Textile dyes from non-colourfast clothing can stain the leather types with a natural surface (Elegance, Natural, Rustic, Sense, White and Optical white) and cause permanent discoloration of the leather. Please be aware of this before using the furniture upholstered with these leathers.

AURA

Aura is a firm and durable leather. It is pigmented and lightly grained with a relatively uniform look. Wrinkles in the swayings, neck wrinkles and other natural marks may occur. The hides have been given a strong surface finish, which makes the leather extremely userfriendly and protected from light and dirt.

DETAILS

European rawhide. Chrome-tanned. Water-based Aniline dye. Water repellent, dirt repellent, stain resistant, smudge-resistant, durable, easy upkeep. A strong, firmer leather that at the same time offers amazing seating comfort. Thickness: 1.4 – 1.6 mm. Surface Matt, firm and strong. A tough grain with a uniform expression
