PANDA / BERGERE ARMCHAIR,  
Paola Navone

Important proportions characterise the Bergere Panda 19 chair, with armrests and an oversized backrest that develops with a considerable height. It is made with a structure and feet in aluminium and weave in white/grey Panda Resin synthetic polyethylene fibre. Synthetic fibres of the latest generation designed to resist water and light and to maintain over time the technical and chromatic qualities, maintain a very natural and durable appearance. The seat and backrest are enriched with oversized cushions with removable upholstery for accentuated comfort.
