The concept

tado is stage and design object at the same time. Because the fine frames offer individual leeway for open spaces and volumes. For staging beautiful things, for modules, boxes and trays. Lightness and cosiness are not mutually exclusive, but form a perfect combination thanks to well thought-out design.

Design: kaschkasch

The subtle difference

tado's design is well thought out down to the last detail. A skilful play of shapes with different profile cross-sections and visible edges. The horizontal profiles, which are only 1.5 x 1.5 cm in size, play a supporting role. Together with visible shelf and front edging, real front joints, low front panels and high plinth profiles an extraordinarily exciting picture is created.

Space for individual design with open space and volumes is provided by shelves, modules, boxes and so on, together with elegant colours and materials.

tado - a homely, elegant shelf that is unrivalled in terms of filigree and stability.

Behind the side profiles the shelf edges are not visible. Top/middle 2.35 cm high, bottom 4.35 cm high.

The visible shelf edges are formally taken up by the protruding fronts. Thus, the repetition of the material thickness of 0.8 cm ensures visual calmness.

Closed plinths - instead of visible adjustable legs - complete the homely impression. Deliberately higher plinth profiles convey the slightly floating character and stability at the same time. Front 3.5 cm high, side 4.35 cm high.

High shelves are open at the top for greater lightness. At the front, the upper metal profiles are kept higher than the middle ones for the optical finish. Front and sides 2.35 cm high.

Shelves and boxes in matt lacquer and grey glass provide the stage for individual play with colours and materials.

Display cabinet shelves protect selected books and magazines. Opened upwards, they attract attention to fine candles, vessels or vases.

With their raised edges, trays conceal things that should not be visible at first glance.

Back panels create the presentation platform for beautiful things; angled shelves with support strip provide space for cherished books, trays and more.

Always different. Therefore, all accessory elements can be moved and added later.

Closed modules are available as:

- Drawer module with one low and one high drawer, width in cm: 100
- Drawer module with one low drawer, width in cm: 100
- Flap module, width in cm: 100
- Hinged door module, width in cm: 35

The genuine horizontal joints in drawers, flaps and hinged doors create an even shadow appearance. To achieve this, the individual panels are elaborately attached to support plates.

For safety reasons, modules with drawers and flaps can be planned from below for the first and second compartment.

Sideboards have top shelves in soft matt lacquer, transparent grey glass or the noble stones Graphite brown patinato, Infinity brown, Arabescato corchia or Taj mahal. Alternatively, 35 and 100 cm wide trays can be planned.

Thanks to the fine vertical profiles made of solid aluminium, no visually disturbing cover caps are required at the top.

The surrounding grooved back panels of the modules and boxes are lacquered as standard and are suitable as room divider back panels.

On request, the modules can be supplied with room divider back panels in front appearance.

Room divider

Laterally mounted to the wall - 81.8 and 197.9 cm high:

- Total width ≤ 204.8 cm no surcharge for room divider.
- Total width > 204.8 cm for add-on shelves order the surcharge for room dividers (= weight plates + metal plates with adjustable legs).

Freestanding room dividers:

- Height 81.8 cm for basic and add-on shelves order the surcharge for room dividers (= weight plates + metal plates with adjustable feet).
- Height 197.9 cm for basic and add-on shelves, it is necessary to order the surcharge for room dividers (= material for floor fixing). 197.9 cm high shelves must be mounted in to the floor for safety reasons.

Colours and materials

The elegant tone-in-tone combination with black anodised metal profiles and transparent grey glass emphasises the filigree appearance. In addition, modules and angled shelves in matt lacquer elephant.

Light colours for the accessories and dark anodising for the metal profiles perfectly emphasise the well thought-out design with visible edges and different profile cross-sections.

Colours and materials

Monochrome colours stand for elegance and cosiness. For this purpose, the colours from the attractive interlücke colour system are matched with metal frames in a slightly darker colour from the colour fans of the manufacturers NCS, Sikkens and RAL. Here modules and shelves in mallow the monochrome metal frame in NCS S 6030 Y90R - for a masterfully subtle light-dark interplay of colours. For colour matching see price list page 2.

Metal profiles and modules are kept in the same colour masala. Mallow, Graphite brown patinato and grey glass set subtle accents.

Stone

Individual lacquer - without control sample

Individual lacquer matt

Order your custom colour as a matt lacquer based on the Caparol Icons, NCS, RAL and Sikkens colour fans.

interlübke processes the order without sending you a control sample.

This rule only applies for matt lacquer, not neon or metallic colours.

Except for colours with a high luminosity (neon) as well as metallic- and pearl effects.

Customised lacquer - only with control sample

Customised lacquer matt

Choose your colour on the basis of the Caparol Icons, NCS, RAL and Sikkens colour fans or your own sample (minimum size DIN A4).

interlübke will produce the customised lacquer (matt) for you after approval of the control sample.

Except for colours with a high luminosity (neon) as well as metallic- and pearl effects.

The delivery date is set once the sample has been approved.

For details about individual and customised lacquer, see page 2 of the price list.
