

SAPHIRA

DESIGN: JOACHIM NEES, 2014

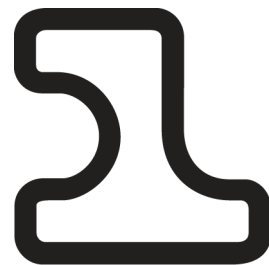

Reclining Chair Saphira

This elegant reclining armchair evolved from the design created by Joachim Nees for Leolux a year before. Given its generous dimensions it is ideal for taller users. Those not quite so tall will find a splendid spot to relax in Saphira, in the same refined shape. The proportions of the armchair have been subjected to scrutiny again. They meet the highest demands in comfort and offer perfect support for the body. And for optimum convenience Saphira is equipped with a wireless remote control and an adjustable headrest.

Features Saphira

- Seamlessly adjustable foot-, back- and headrests.
- Long footrest for extra support.
- Four-spoke swivel foot in brushed stainless steel.
Option: Leolux epoxy and lacquer colours (except Style)
- Wireless remote control.
- Available with mains cable or battery version (option).
- Extra comfort option: seat height +2 cm.
