

## **BOX** (Designer James Irvine)

Special mention in the FX International Interior Design Awards 2006

A multifunctional storage unit, stackable and swivel.

Made of MD 8 mm thick wood fibreboards, coupled together by means of dovetail joints, **goffered lacquer in white.**

Fully rotating base **made of Baydur** (ø 44 cm), in height 7 cm, goffered lacquer in white, capacity load 300 kg.

The various elements (base/intermediate or top), all in size 42 cm, are distinguished according to use:

**MEDIA BOX:** a square unit (42cm), in height 50cm, to hold CD/DVDs and alike. **In white lacquer, and backs in grey.** The special compartments for CD/DVDs can hold 144 CDs and 68 DVDs.

**OFFICE BOX:** a square unit (42cm) in height 75cm, for office use to hold binders, books, magazines and CDs. **In white lacquer, backs alternately in white and grey.** The special compartments for CDs can hold 100 CDs.

**MULTI BOX:** a square unit (42cm), in height 75cm, to hold books, CD/DVDs among others. **In white lacquer, backs in alternately white and grey.** The special compartments for CD/DVDs can hold 120 CDs and 27 DVDs.

**Configurations:** on the swivel base you can stack more elements creating configurations in various heights (57, 82, 107, 132 and max. 157cm).

**You can always stack different kinds of storage units.**

**Thanks to an innovative coupling system you can install the units choosing the side you like (rotation every 90°); they can also be put upside down (except for the tops), thus creating a variety of configurations.**

### **ACCESSORIES**

Plexiglass dividers in red, yellow and orange with reflecting effect, provided with a white self-locking sliding device. With a standard thickness of 12mm and a standard width of 148 mm, the CD dividers for Multibox and Officebox come in height 138 mm, in height 145 mm for Mediabox. DVD dividers for Mediabox and Multibox come in height 236 mm.
