RECONSTRUCTED STONE

Stone, cleverly reconstructed through a blend of natural and industrial materials, artificially reproduces the **sedimentation process of river sandstones**.

This reclaimed stone-based blend enables to get quite a **natural and smooth surface, soft to the touch**.

This excellent element mixture generates irregular shades and colours, typical of sedimentary rocks and it is further increased by its **handmade application** on the products. Manual application highlights surface non-uniformity, making **every element unique and original**, a guarantee of preciousness and uniqueness of the finished product.

Maintenance:

Stone has an excellent mechanical and chemical resistance, yet, at the same time, it is delicate due to its particular surface.

In order to avoid stains and spots, the operations described hereafter must be carried out on the whole surface, by making circular movements.

For ordinary maintenance, use a soft cloth moistened with water. For deep cleaning, please use a soft cloth moistened with a small amount of non-abrasive neutral detergent (for instance a degreaser). At the end of the operation, rinse the surface with a soft cloth dampened with water and dry with a dry soft cloth.

It is recommended:

- To use mild soap and water and to dry with a clean soft cloth;
- To use any common neutral detergent, provided it does not contain neither chlorine nor chlorine derivatives, such as bleach and muriatic acid;
- Do not use any abrasive materials that would unavoidably scratch the surface;
- Avoid shocks and etchings by using blunt items capable of scratching the surface, subsequently removing its protective section;
- Avoid any deposit and prolonged retention of liquids to prevent long-lasting stains and marks from forming;
- Do not use any alcohol, stain removers, diluent, acetone, trichloroethylene, ammonia, bleach, limescale remover, as well as liquids containing such substances;
- Do not use any abrasive powder detergents, capable of damaging the aesthetic and surface finish look;
- Do not drag any objet on the top and do not insist to clean a single area of the top (it may alter its opacity);
- Try not to lay hot pots and objects, as well as ovens or small ovens that may cause deformations and yellowings.
