

2019 - 2020

INDOOR / OUTDOOR

A table with a mono-material finish, entirely covered in aluminium sheet.

Available in a goffered white, corten, pewter, and black iron painted finish.

The pewter and black iron finishes have a cloudy shaded effect, a feature and peculiarity of this specific finish.

#### Tops:

The load-bearing top, 35 mm thick, is a composite panel made up of an inner frame of galvanised steel profile, painted with a specific treatment for outdoor use, and filled with polystyrene. This is completely covered, both on the top and on the edges, by a goffered painted aluminium sheet.

Available in the following dimensions, either square or rectangular:

- 90x180
- 100x240
- 120x280
- 120x290
- 140x140

#### Legs:

Extruded aluminium legs, 35x35 cross section, with stainless steel structural tie-rod and adjustable feet.

Height 73 cm.

#### NOTE

The dimensional tolerance in both width and length is 0/+ 5mm.

Special sizes are not available.

Please specify in the order if the tables would be eventually put close one another.

For further information about specs, please refer to the technical section of the price list from page 397 (tables of materials/colours).

#### Outdoor use

Any material left outdoor, even if properly treated, due to the action of weathering, can have superficial molecular and colour changes during its lifetime. Of course the amount of alteration is directly related to the amount of exposure to weather and to the geographical area. Regular maintenance, for instance periodic cleaning with water, increases resistance to corrosion.

During winter and when the items are not in use, we recommend covering the structures with the specific optional cover accessories.

#### ACCESSORIES

Protective tarpaulin specifically for outdoor products, waterproof, made of 100% polyester, outside with acrylic coating, inside with acrylic resin coating.

Its characteristics are emphasised by its fully fungicidal Teflon finish.

Each tarpaulin comes with a closable slip cover, so that it can be folded and kept correctly when not in use.

#### Use and Maintenance:

For correct washing, use a delicate neutral soap and water, and rinse thoroughly after washing, using only water.

After cleaning, allow the fabric to dry correctly before folding it and putting it away, to avoid it getting mouldy.

**NB** Avoid the fabric coming into direct contact with weed killers, fertilisers, and chlorine, as these may stain the protective tarpaulin indelibly.

#### Strength:

- Tensile strength: warp: 125 DaN/5 cm - weft: 120 DaN/5 cm
- Tear strength: warp: 2.5 DaN - weft: 2,5 DaN/5 cm
- Light resistance: level 6/8
- Heat resistance: +70°C
- Cold resistance: -30°C
- Column of water: approx 1000 mm

#### FINISHES

P123 = goffered white painted X124

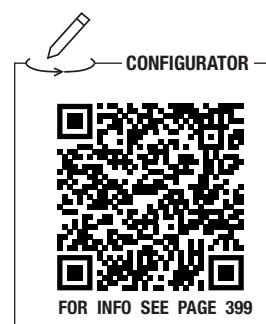

P124 = goffered corten painted X128

P125 = goffered pewter painted (cloudy shaded effect) X129

P126 = goffered black iron painted (cloudy shaded effect) X130
