Redefining The Classic Task Chair

Introducing Normann Copenhagen's new comfortable, flexible and beautiful task chair design. Off Chair is crafted with a specific focus on catering to the need for aesthetic office environments while providing a highly functional and versatile task chair with a meticulous attention to detail and comfort. Off Chair provides all the classic functions of a task chair with essential technical elements such as gas lift and tilt functions beautifully integrated into the construction of the chair. The design offers immediate comfort, providing the ideal conditions for a good working posture throughout the day.

Uniting Comfort, Functionality and Aesthetics

Equally suitable for home offices and corporate workplaces, Off Chair is designed for environments where high sitting comfort, functionality and an aesthetic design are of great importance. Designer Simon Legald, explains:

“Task and office chairs are made to serve a functional purpose. This is typically the main priority in the design, oftentimes at the expense of its aesthetic appeal. The idea for Off Chair was to create an aesthetically pleasing task chair that you would want to incorporate in your interior, just like you would a lounge or dining chair – without compromising on its functionality and flexibility.

Off Chair unites function and design by integrating all mechanical elements inside the construction. The result is a comfortable task chair that can be adjusted according to sitting preference, customized to any need, and which fits effortlessly into any interior”.

A Timeless, Customizable Design

With specific attention to creating a timeless design, Off Chair’s design idiom applies uncomplicated, straightforward silhouettes for a classic, ever-relevant design. Off Chair obtains its minimalist expression through its rectangular, yet slightly rounded frame. Soft upholstery complements the cool shine of the aluminum, presenting a contrasting, tactile expression.

Off is available with optional cushioned pads, which, in addition to their aesthetic appeal, serve to provide the design with further comfort. The seat and backrest come in either high or low in a wide selection of various fabrics and leathers, providing an array of color choices for personal customization. The possibility of choosing a chair with or without armrests allows for tailoring it to any specific need, taste or setting

A Sturdy and Durable Construction

Off Chair is constructed from rigid PU foam and full upholstery with a steel reinforcement structure inside. The high back is crafted with attention to providing optimal support for many hours by the desk and can be selected in either low or high versions for additional support. The legs and armrests come in polished aluminum or black powder-coated aluminum, and the base is available as either a four-star fixed based or five wheels for extra mobility. The five wheel base offers the additional mobility of tilt and gas lift functions, providing extra flexibility. A subtle cover discreetly integrates the mechanical components beneath the seat – an innovative solution designed to expertly incorporate the technical components into the appealing design. A small lever handle enables the tilt function to be either locked in a static position or unlocked for unrestricted tilt movement.

The versatile chair serves to unite form and function in a timeless design while catering to the needs of modern office spaces in residential, commercial and corporate settings.
