**WONDERS
OF THE WORLD
OF WINE**

THE TASTE

The wine reaches new heights.

By simply using WinePerfector,
you will notice a significant
improvement of the wine.

Flavors will come out more,
and the finish will improve.

That's how the wine makers
want you to drink their wine.

POURING

Extremely easy to use.

Once WinePerfector been put on the bottle, you can serve immediately.

Wine may be poured from the bottle in any direction.

Thanks to the built-in dual-functional pipes, the WinePerfector works optimally regardless of how one chooses to pour the wine.

AERATION

A technical wonder.

It is a dream to aerate the wine whilst pouring.

In WinePerfector an air mixing chamber has been developed to oxidize the wine when pouring.

The built-in mesh is in its dimensions precisely balanced, so wine and air are mixed properly during serving.

To start this process, the 7 built-in dual-functional tubes are supported by 8 small vents positioned at the grid edge.

FILTER

Captures cork and tartar.

WinePerfector's built-in mesh is so dense, that tartar, cork residues and other impurities are kept back when pouring. This ensures optimal enjoyment of the wine.

WinePerfector is simply cleaned under running water. Do not use dishwasher.

NO DRIP

No wine stains on the cloth.

It is not necessary to use napkin or drip collar in order to avoid unwanted droplets on the table.

With the WinePerfector, it makes no difference which direction you turn the bottle.

The dual pouring edge of the WinePerfector ensures no dripping in connection with pouring.

AIR TIGHT STOPPER

Keeps leftovers fresh until
next day.

Wine left over is not a problem.
It can be saved and the good
quality can be preserved.

The separate (air tight) stopper
ensures good wine stays fresh
for a day or two after opening.

Opened wine should be
stored upright and airtight..

COVERS FOIL EDGES & SCREW TREADS

Especially on older vintages foil may have 'stuck' and become difficult to cut neatly. Unfortunate cut foil edges are completely hidden by WinePerfector.

More and more wineries choose to use screw caps instead of corks. The outer metal casing of WinePerfector hides the threads of screw top bottles.

In this way bottles are elevated into an elegant, exclusive level.

ONE-HAND OPERATION

Simple to use

One-hand operated.
Just pour.

No need for napkin or drip
collar on the bottle.

Marcus Vagnby
Industrial Designer

VAGNBYS

DESIGN & LIVING

Firmly constructed objects, beautiful in shape and effective for its purpose. Add ideas exceeding shape and function, and good design is created.

Danish industrial designer Marcus Vagnby shows with minimalist aesthetics how mind, function and materials go up in synthesis. This is experimental modern design in its use of materials and is often inspired by genuine necessity.

His design maintains elements of surprise and deep intellectual beauty, because it relies more on invention than on the development of styles.

Vagnbys Design & Living is made for the modern and conscious consumers who want a modern home where style and elegance is of high priority.
