

PAPER YARN CARPET

HOW TO CARE FOR YOUR WOODNOTES PAPER YARN CARPET

CARE INSTRUCTIONS

Woodnotes paper yarn carpets are supplied with industrial soil-repellent treatment. The treatment forms a protective molecule foil on the surface and prevents dirt from soaking into the paper fiber. It makes it easier to care for the carpet, but doesn't mean no cleaning is necessary. The protection lasts for about 1-3 years, depending on the using conditions. The treatment can be renewed. Before re-treating the carpet, it is advisable to have the carpet cleaned.

Vacuum cleaning is sufficient for everyday care of a Woodnotes carpet. Vacuuming under the carpet monthly is also suggested. To remove any loose dirt, you can wipe the carpet with a lightly damp soft cloth in weft direction.

Paper twine carpeting should not be beaten or shaken. If you want to air your carpet, you should roll it loosely and place it in vertical direction on a flat surface.

REMOVAL OF STAINS

Stains or spots should be removed right away. React immediately and remember to clean gently. Work from the sides of the stain toward the center to prevent the stain from spreading.

Any dried surface stains such as food and other protein stains or stearin should be scraped off, for instance with a sharp knife. Be careful not to damage the surface of the paper twine. Never scrub or rub.

Any liquids (juice etc. water soluble liquids) spilled onto the carpet should be dabbed immediately with a piece of white paper towel or white, absorbent cotton terry towel. Wet a cotton towel with cold water and squeeze out excess water. The affected area should be treated by tapping it with a damp towel. A drop of mild washing-up liquid or textile cleaner for natural fibers can also be added to damp towel if there is grease on the stain. Rinse out by using a clean damp sponge or towel. Do not rub when the surface is wet. Finally dry the affected area by tapping it with dry towel and blot the moisture. It is also important to examine under the carpet for liquid. A large spill may find its way through the carpet and in this case, repeat the stain removal process on the other side of the carpet as well.

WASHING

Avoid unnecessary cleaning and washing. Washing expedites wear and tear of your carpet.

The best way to wash the paper yarn carpet is using textile washer with steamer, steam-cleaning. The steam-cleaning washing method is gentle for the surface and texture. Use minimum moisture setting on the machine. Shampoo cleaning with a washer fitted with a vacuum extractor is also recommended. Restricted and careful level wash by specialist carpet cleaners.

Do not spin-dry.

Do not soak.

Do not bleach.

Do not wash and/or dry in a cylinder machine.

Do not dry clean.
